

Deer Resistant Plants

The following list of plants is derived from several different sources. Many of the plants on this list share certain characteristics, such as strong fragrance, thorns or hairy foliage, or toxicity. If you don't see a plant on the list but it has some of those same traits you may find it to be deer resistant as well. Remember that these plants are not deer proof. If the deer in your area are hungry enough they will eat anything.

Annuals

Ageratum	
Alternanthera	
Alyssum	
Angelonia	
Antirrhinum	Snapdragon
Begonia	
Bidens	
Brachycome	Swan River Daisy
Brugmansia	Angel's Trumpet
